## BlackCSI Receives Cybersecurity Certification

*Leading Unified Communications  
Provider Protects Local Businesses  
From Cyber Attacks*

Harrisburg – September 28, 2017 - BlackCSI a leading provider of unified communications has announced that the company is certified to provide cybersecurity solutions to SMBs (small to mid-sized businesses) to protect them from the barrage of cyber-attacks that occur every day. Cybercrimes are a serious threat and most businesses cannot afford to become the victim of malware, ransomware, phishing, password attacks, denial-of-service (DOS) attacks or malvertising of any sort for a prolonged period of time. Recent advancements in preventative technology have helped SMBs safeguard themselves from unnecessary attacks, network vulnerabilities and company downtime that can often result from such disruptions.

BlackCSI invests heavily in its staff of IT professionals, in order to insure that everyone is highly trained, highly certified and fully equipped to protect customers from cyber-attacks. “It’s incredibly important to

continually invest in our people,” stated Ruthann Black, President of BlackCSI. “When we invest in our technicians’ technical abilities, we are investing in our customers’ safety. This is why we’re constantly watching the technological horizon and educating our team so that when our customers need help, they are working with a world-class expert, not just some person who dabbles in IT.”

Most business owners are usually more focused on conducting revenue generating activities, instead of assessing potential IT vulnerabilities. This is why many SMBs have opted to outsource their IT to an external managed IT services provider; simply because they don’t have the time, expertise nor inclination to become an expert in these facets of business. By partnering with a trusted IT advisor, whose sole mission is to remain one step ahead of hackers, SMBs can remain focused on their top priorities and continue to grow their organizations to new heights.

“The security landscape is constantly changing in order to stay up with the latest global attacks. Since education, research, and development has been a cornerstone of BlackCSI, the company is able to stay a step ahead and provide the right guidance to customers to properly secure their networks now and into the future,” add Ms. Black.

### About BlackCSI

BlackCSI is a provider of scalable technology solutions focused on delivering ROI for our clients. We have deep experience in delivering project-based services to organizations in the commercial, government, and non-profit sectors. BlackCSI follows simple guidelines with its clients: listen, learn, clarify, and reiterate. This methodology is crucial to its success and is the foundation that drives a successful partnership between consultants and clients.

Founded in 2002 by Ruthann Black, BlackCSI excels in assisting customers with our range of products and services including unified

communications, managed services, communication and security integration, IT infrastructure design and support, IT hardware sales, help desk services, training development and delivery,

project management, business and requirements analysis, system testing, and mobile solutions. As a Pennsylvania-certified Small Diverse Business (SDB), BlackCSI is dedicated to providing unsurpassed quality,

uncommon honesty, and amazing customer satisfaction throughout every aspect of our product and services delivery.
